

5A CITRUS SEWER PRODUCTS

Natural blends are available as lower cost alternatives to pure citrus

- RCS4450 ORANGE NATURAL 20**
A natural water dilutable citrus product that derives its strength from citrus extracts and biodegradable surfactants. This orange based formula dissolves light grease and other waste from sewer, grease traps and lift stations. Naturally leaves citrus scent. Use straight for solvent like degreasing action. Heavy soils use 15-20 oz. Gallon. Light soils use 4-5 oz. per gallon.
- RCS4500 ORANGE GREASE DIGESTER 80 Water dilutable sewer, grease, & lift station cleaner**
80% active super citrus degreasers for the quick acting natural degreasing. Can be diluted with water for degreasing or order control. Use by drip or pouring in drains and grease traps to clean and de-clog. Forms a stable microemulsion when mixed with water. Can safely be used for maintenance of grease traps and drains to prevent build up. Removes, grease, tar, ink, decals, grime, dirt etc. Use on tools, equipment, cables, tire marks, lift stations. RCS4500 will dilute almost clear with water.
- RCS4510 ORANGE GREASE DIGESTER 100 Super strength miscible sewer, greaser, & lift station cleaner**
100% natural super citrus degreasers for the quickest acting natural degreasing. Can be diluted with water for degreasing or odor control. Use by drip or pouring in drains and grease traps to clean and de-clog. RCS4510 forms white emulsion when mixed with water. These products can safely be used for maintenance of grease traps and drains to prevent build up. Removes grease, tar, ink, decals, grime, dirt etc. Use on tools, equipment, cables, tire marks, lift stations. Note RCS4510 can be made non emulsifiable for floating lift station degreaser if requested. RCS4510 forms a milky stable emulsion when mixed with water.
- RCS4530 CITRA-LIFT: Natural floating lift station degreaser & deod.**
100% natural floating degreaser. Designed specifically for cleaning lift station and controlling odors. Step 1: Quickly forms an odor barrier by floating and capping lift station. Step 2: Creates a pleasant smelling citrus environment. Step 3: Quickly saponifies grease and organic obstructions. A revolutionary, safe formula that floats up and down with the rise and fall of the station platform keeping the sides of the station clean. CITRA-LIFT cleans off soil, dissolves grease and oil, softens solid waste and eliminates objectionable odors.
